SESSION 4 • HANDS-ON PRACTICAL

Artificial Intelligence :
Concepts, Tools and Applications

Build Your Own

Portfolio Website

Using AI — No Coding Required!

✦ ChatGPT

✦ Claude.ai

✦ GitHub Pages

What We'll Do Today

01 🧠 **Prompt Engineering Basics**
Learn how to write great AI prompts
10 min

02 💬 **Generate Prompt via ChatGPT**
Ask ChatGPT to write the perfect Claude prompt for a portfolio site
10 min

03 🤖 **Build Website with Claude.ai**
Paste prompt into Claude.ai → get full HTML/CSS website code
15 min

04 🐙 **Deploy FREE on GitHub Pages**
Create repo → upload code → get a live public URL
20 min

05 🚀 **Your Live Website is Online!**
Share your link with the class — you're a web developer now!
5 min

01 Prompt Engineering — The Art of Talking to AI

Prompt Engineering = Crafting clear, specific instructions to get the BEST possible output from an AI tool.

✗ Weak Prompt

"Make a website for me"

Too vague. AI doesn't know who you are, what you want, what style, what content...

✓ Strong Prompt

"Create a single-page HTML portfolio for a school teacher named Priya Sharma, with sections for About Me, Skills, and Contact. Use green and white colors. Modern, clean design."

5 Rules for Great Prompts:

1. Be Specific

Give details — name, purpose, style

2. Give Role

"Act as a web developer..."

3. Set Format

HTML, list, table, paragraph?

4. Give Examples

Show what you like or don't like

5. Iterate

Ask follow-ups to improve results

02 Step 1: Use ChatGPT to Write Your Claude Prompt

Why Ask ChatGPT First?

- ChatGPT is great at writing prompts
- It helps structure your requirements
- Saves you from guessing what to type
- You get a professional, detailed prompt
- Works as a 'prompt generator' for Claude

Go to: chat.openai.com

(Free account — sign up with Google or email)

1. Click 'New Chat'
2. Type the meta-prompt below
3. Copy the full output
4. Switch to claude.ai for next step

TYPE THIS into ChatGPT:

I am a school teacher named [YOUR NAME]. I want to create my personal portfolio website. Please write me a detailed prompt I can give to Claude.ai (an AI assistant) to generate a complete, beautiful single-page HTML + CSS portfolio website. The site should include: a hero section with my name and tagline, about me section, my subjects/skills, my achievements, a contact section. I want a modern, professional look with [your favorite color] as the primary color. The prompt should ask Claude to return only raw HTML code, no explanations.

⚡ **Replace [YOUR NAME] and [your favorite color] with your own details!**

What ChatGPT Will Give You — Sample Output

ChatGPT Response — Copy this entire prompt and take it to Claude.ai

You are an expert web developer. Create a complete, beautiful single-page portfolio website for a school teacher named Priya Sharma.

REQUIREMENTS:
• Hero Section: Full-width banner with name "Priya Sharma", tagline "Inspiring Minds, Shaping Futures", and a professional avatar placeholder
• About Me: 3-4 sentence biography, teaching experience (8 years), school name (Govt. Senior Secondary School, Ludhiana)
• Subjects & Skills: Mathematics, Science, Computer Basics, MS Office, Digital Literacy
• Achievements: Best Teacher Award 2023, 95% student pass rate, NIELIT certified trainer
• Contact: Email, phone, school address with a simple contact form

DESIGN: Modern, clean layout. Primary color: #2563EB (blue). White background. Card-based sections. Smooth hover effects. Mobile-responsive.

OUTPUT: Return ONLY the complete HTML file with embedded CSS. No explanations. No markdown. Just raw HTML starting with <!DOCTYPE html>

✓ This is your prompt! Copy it → Open claude.ai → Paste it → Press Enter

03 Step 2: Paste Prompt into Claude.ai → Get Your Website Code

How to use Claude.ai

1. **Open Browser**
   Go to claude.ai — Sign up free with Google account
2. **New Conversation**
   Click '+New Chat' button on left sidebar
3. **Paste Your Prompt**
   Ctrl+V to paste the full prompt from ChatGPT
4. **Send & Wait**
   Press Enter — Claude generates your full HTML in ~15 seconds
5. **Copy the HTML**
   Click 'Copy' on the code block or select all text
6. **Save as File**
   Open Notepad → Paste → Save as 'index.html'

What Claude Generates For You

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Priya Sharma | Teacher</title>
  <style>
    * { margin: 0; padding: 0; }
    body { font-family: 'Segoe UI', sans-serif; }
    .hero {
      background: linear-gradient(
        135deg, #2563EB, #1E40AF);
      color: white;
      padding: 80px 20px;
      text-align: center;
    }
    .hero h1 { font-size: 3rem; }
    .about, .skills, .contact {
      padding: 60px 40px; }
    ...
  </style>
</head>
<body>
  <section class="hero">
    <h1>Priya Sharma</h1>
    <p>Inspiring Minds, Shaping Futures</p>
  </section>
```

💾 Save Your Website File Correctly

METHOD 1 — Notepad (Windows)

- Press Windows key → type 'Notepad' → Open
- Go back to Claude.ai → Click Copy on code block
- In Notepad: Ctrl + V (paste the HTML code)
- Click File → Save As
- **In "File name" box: type index.html**
- **Change "Save as type" to: All Files (*.*)**
- Choose Desktop as save location
- Click Save ✓

METHOD 2 — VS Code (Better)

Download: code.visualstudio.com (free)

- Open VS Code → File → New File
- Ctrl+V to paste HTML
- Ctrl+S → name it index.html
- Ctrl+Shift+P → Open with Live Server (to preview)

🔍 Preview Your Website

Double-click your saved index.html file
→ It opens in Chrome/Edge as a website!
→ If it looks good, you're ready for GitHub!

⚠️ File MUST be named exactly index.html (lowercase) — GitHub Pages requires this!

04

Step 3: Create a GitHub Account

What is GitHub?

GitHub is a FREE platform to store, share and publish code. GitHub Pages lets you host a website for FREE with a public link — no server needed, no cost, ever!

How to Create a GitHub Account:

Open github.com

Go to github.com in your browser (Chrome/Edge)

Click 'Sign Up'

Top right corner — blue button

Enter your Email

Use your personal email (Gmail recommended)

Set Password

Min 8 characters with number and letter

Choose Username

e.g. priya-sharma-teacher (this becomes your URL!)

Verify & Create

Complete the puzzle verification → Click 'Create account'

Your future website URL will be: https://[your-username].github.io/portfolio/

📁 Create a GitHub Repository (Your Website Folder)

1

Click "+" then "New repository"

Find the "+" icon in top-right corner of GitHub → Select "New repository"

2

Name your repository

Type exactly: `portfolio` (lowercase, no spaces). This becomes part of your website URL

3

Set to Public

Select "Public" — required for free GitHub Pages hosting. Private repos need a paid plan.

4

Check "Add a README file"

Tick the checkbox for README — this initializes your repository with a starter file

5

Click "Create repository"

Green button at the bottom. Your repository is now created and ready!

✅ Repository URL will be: github.com/[your-username]/portfolio

Upload Your index.html to GitHub

1. **Open your portfolio repository**
   Go to github.com/[your-username]/portfolio

2. **Click "Add file" → "Upload files"**
   Find this button near the top of the file list. Click it.

3. **Drag & Drop your index.html**
   Drag your saved index.html file into the upload area, OR click 'choose your files'

4. **Write a commit message**
   In the text box below, type: "Add portfolio website" (describes what you uploaded)

5. **Click "Commit changes"**
   Green button at the bottom — this saves and uploads your file to GitHub!

🎉 You will now see index.html listed in your repository — great progress!

🌐 Enable GitHub Pages — Make It LIVE!

Follow These Steps in GitHub Settings:

1. **Go to your "portfolio" repository**
   Click your repository name on GitHub
2. **Click "Settings" tab**
   It's in the top navigation bar of your repository
3. **Scroll down to "Pages"**
   In the left sidebar, find "Pages" under "Code and automation"
4. **Under Source: select "Deploy from a branch"**
   Click the dropdown under "Source"
5. **Branch: select "main" → folder: "/ (root)"**
   These are the default settings — just confirm them
6. **Click "Save"**
   GitHub will now build and deploy your website!

⏳ Wait 1-2 Minutes

GitHub needs ~1-2 minutes to build your site. The page will show a blue/green banner when ready.

🔗 Your Website URL:

https://[username].github.io/portfolio

Copy this link → Open in new tab → Your website is LIVE on the internet!

Your Website is LIVE!

You just built and deployed a real website — using AI!

0	FREE	∞
Lines of code you wrote manually	Cost to host your website	People who can visit your site

Share your website URL with the class! https://[yourname].github.io/portfolio

✨ Customize & Improve Your Portfolio with AI

Ask Claude.ai to improve your website — sample follow-up prompts:

Add Animation

"Add smooth scroll animations and a typing effect to the hero title in my HTML file"

Dark Mode

"Add a dark/light mode toggle button to my portfolio website"

Photo Upload

"Add a professional circular profile photo section in the hero area"

Better Colors

"Redesign my portfolio with a navy blue and gold color scheme, more premium look"

Contact Form

"Add a working contact form with name, email, and message fields with basic validation"

New Section

"Add a photo gallery section showing 6 classroom images with hover zoom effect"

💡 Pro Tip: Say 'Modify only this section of my HTML code:' and paste just that part — faster edits!

The Complete AI-to-Website Pipeline

1

You

Your info & preferences

2

ChatGPT

Generates perfect prompt

3

Claude.ai

Writes full HTML code

4

index.html

Saved on your computer

5

GitHub

Store & publish code

6

Live Website

Public URL, free forever

The New Teacher Superpower:

You don't need to learn HTML, CSS or programming. AI writes the code → You customize with natural language → Deploy free!

What Else Can You Build with AI?

Class Website

A website for your class with timetable, homework, notices & photo gallery

Study Materials

Interactive HTML notes with headings, diagrams, and quizzes embedded

Digital Notice Board

School announcements page — update it anytime by editing one file

Student Showcase

Display student projects, art, and achievements online for parents

Result Dashboard

An HTML table showing class results — sortable, printable, professional

School Garden Blog

Document your school garden, science experiments, or events with photos

Just tell Claude.ai what you want to build, and say "return only raw HTML code" at the end. That's it!

Common Problems & Quick Fixes

? Website not loading after enabling Pages?

✓ Wait 2-3 minutes and refresh. GitHub takes time to deploy. Check the Actions tab for build status.

? index.html not found error?

✓ File name must be exactly "index.html" (lowercase i, .html not .HTML). Check in the repository file list.

? Claude gave incomplete code?

✓ Ask: "Continue from where you left off" or "Give me the complete HTML file from start to finish"

? Website looks broken in browser?

✓ Ask Claude: "My HTML is not rendering correctly. Here is the code: [paste code]. Please fix any errors."

? Want to update the website later?

✓ Edit in Claude → Get new code → Go to GitHub → Click index.html → Click pencil icon → Paste new code → Commit.

? GitHub Pages URL giving 404 error?

✓ Ensure Pages is enabled in Settings. Ensure your file is in the root of the repository (not in a folder).

🔊 Still stuck? Ask the trainer - no question is too small!

🏆 Session Takeaways

1. AI is a tool multiplier — ChatGPT helps you write better prompts for other AI tools.
2. Claude.ai can generate complete, working websites from a single text description.
3. GitHub Pages gives every teacher a free, professional web presence in minutes.
4. You don't need coding skills — natural language is the new programming language.
5. AI-built websites can be improved iteratively — keep asking until you're satisfied.

🎯 **Homework: Share your portfolio URL with 3 colleagues. Help them build theirs!**

Thank You!

You're now an AI-powered teacher & web developer!
